# Contents of Volume 11

## No. 1, February 1990

UV resonance Raman spectra of bacteria, bacterial spores, protoplasts and calcium dipicolinate
*R. Manoharan, E. Ghiamati, R. A. Dalterio, K. A. Britton, W. H. Nelson and J. F. Sperry (USA)* 1

A procedure for the preparation of rRNA from Legionellaceae for use in 16S-rRNA sequencing
*K. F. Fox and A. Brown (USA)* 17

Fluorescence pulse shape as a morphological indicator in the analysis of colonial microalgae by flow cytometry
*A. Cunningham (UK)* 27

Preparation of spheroplasts from the strict anaerobe *Selenomonas ruminantium*
*T. A. Michel and J. M. Macy (USA)* 37

Evaluation of different enrichment media for the isolation of *Salmonella* from polluted seawater samples
*M. A. Moriñigio, M. A. Muñoz, R. Cornax, D. Castro and J. J. Borrego (Spain)* 43

An efficient device for sterilizing irregular surfaces
*A. G. T. Volpon, C. A. Elias and A. Drozdowicz (Brazil)* 51

A post growth overlay transforms the conventional nonspecific XP plate assay into one specific for alkaline or acid phosphatase activity
*T. A. Alcorn, T. E. Colonna, S. M. Green, K. W. Thomulka and P. Campbell (USA)* 59

A transparant medium for isolation of *Legionella pneumophila* from environmental water sources
*R. Armon and P. Payment (Canada, Israel)* 65

Isolation of prokaryotic RNA and detection of specific mRNA with biotinylated probes
*U. Oelmüller, N. Krüger, A. Steinbüchel and C. G. Friedrich (FRG)* 73

## No. 2, April 1990

A rapid in situ expression test for virulence-associated proteins of *Yersinia enterocolitica*
*M. Naumann, C. Hanski, B. Friedrich and E.-O. Riecken (FRG)* 83

Displacement of surface-bound cationic dyes: a method for the rapid and semi-quantitative assay of metal binding to microbial surfaces
*I. Savvaidis, A. Nobar, M. N. Hughes and R. K. Poole (UK)* 95

Detection of endotoxins with limulus amoebocyte lysates of *Limulus polyphemus* and *Tachypleus tridentatus* origin
*P. Huovinen, L. Nummela and J. Koppinen (Finland)* 107

A novel gas-gradient mixing device for simultaneous production of a wide range of gas concentrations
*J. W. T. Wimpenny, L. Boddy, J. K. Harrison and T. N. Williams (UK)* 115

Direct amplification of DNA from colonies of *Bacillus subtilis* and *Escherichia coli* by the polymerase chain reaction
*P. E. J. Saris, L. G. Paulin and M. Uhlén (Finland, Sweden)* 121

Effects of radioactive labelling of macromolecules, disturbance of bacteria and adsorption of thymidine to sediment on the determination of bacterial growth rates in sediment with triated thymidine
*D. J. W. Moriarty and P. C. Pollard (Australia)* 127

Permeabilization of *Trypanosoma cruzi* epimastigotes. A highly efficient method to study soluble and particulate enzymes in situ
*G. Lucchesi, G. Racagni, M. García de Lema and E. E. Machodo de Domenech (Argentina)* 141

## Nos. 3, 4, July 1990

Sensitive method for the determination of oxygen affinity in growing bacteria
*M. M. A. Ferdinandy-Van Vlerken, E. Jeronimus, W. De Vries, A. H. Stouthamer and H. W. Van Verseveld (The Netherlands)* 151
Scanning electron microscopy of immobilized bacteria in gel beads: a comparative study of fixation methods
*A. R. W. Van Neerven, R. H. Wijffels and A. J. B. Zehnder (The Netherlands)* 157
Determination of $^{15}N$-labelled ammonium and total nitrogen in plant and fungal systems using mass spectrometry
*H. Ek, R. D. Finlay, B. Söderström and G. Odham (Sweden)* 169
Subtyping of *Klebsiella* by biochemical fingerprinting: a simple system for epidemiological investigations
*I. Kühn, L. G. Burman, L. Eriksson and R. Möllby (Sweden)* 177
A simple method of detection of toxigenic *Clostridium botulinum* type B strains
*R. Gryko, D. Goszczyński and Z. Lorkiewicz (Poland)* 187
Analysis of lipopolysaccharide (lipid A) fatty acids
*A.-W. Wollenweber and E. T. Rietschel (FRG)* 195
A characterization method for mutants in malolactic enzyme activity
*P. Chagnaud, P. Naouri, A. Arnaud and P. Galzy (France)* 213
An ascorbate-reduced medium for nitrogen metabolism studies with *Selenomonas ruminantium*
*S. C. Ricke and D. M. Schaefer (USA)* 219
Spectrophotometric determination of urea-ammonia in the urea degradation pathway of *Saccharomyces cerevisiae*
*C. Low and B. G. Adams (USA)* 229
Methods for mutagenesis of *Bacillus thuringiensis*
*I. T. Crawford and U. N. Streips (USA)* 241
Differentiation of *S. gallinarum* and *S. pullorum* by means of growth-kinetics analysis
*C. Papadopoulou and K. Ioannides (Greece)* 247
Spectrophotometric determination of refractive index increment for bacterial cells
*T. R. Corner, T. C. Beaman, J. T. Greenamyre and P. Gerhardt (USA)* 255
Digoxigenin-labeled DNA probe to detect TEM type $\beta$-lactamases
*L. Gallego, A. Umaran, J. Garaizar, K. Colom and R. Cisterna (Spain)* 261
